

## Default Question Block

The 2020 International Summer Institute will be held August 10 – 14, 2020 at CITRIS located at the University of California Berkeley. This is an intensive one-week program with peer students, researchers and industry leaders. The 2020 topics include research methods and approaches for health informatics and digital health, plus a special focus on data science, robotics, artificial intelligence, and associated data governance and ethical-legal issues.

The cost of the program is \$600 (US) for students and post-docs, and \$1000 (US) for faculty and other researchers. This fee covers the cost of the program, lunches, and several social events.

All potential attendees must complete this short application. Two additional questions will be asked of those who are seeking funding via the International Fellowship Award.

## International Fellowship Award

Fellowships are available to support the attendance of currently-enrolled PhD students and post-doctoral trainees. Successful applicants will be named 2020 International Fellows and receive remission of the \$600 program fee which covers summer institute attendance, lunches, tours, and several dinner social events. A limited number of Fellows may also receive partial reimbursement for travel and accommodations.

## Program eligibility and requirements

Prospective Fellows must be currently enrolled and in good standing in a PhD program (at the time of application and for the fall of 2020) or be a trainee in a post-doctoral position. Priority will be given to PhD students and post-docs at a TTRN-affiliated university or a CITRIS-affiliated campus of the University of California. Applicants from other universities will be considered after priority candidates have been reviewed.

Fellowship applications including a letter of support will be accepted on a rolling basis from January 8, 2020 to February 28, 2020. Early applications are encouraged as awards will be made on a rolling basis. Fellows will be notified of award by April 1, 2020. Acceptance of the award and registration must be completed by April 15, 2020.

Fellows must attend the entire five-day program and plan for travel two days before the program. All attendees must submit a five-page (single spaced) academic research paper related to the topic proposed in the application by Aug. 1, 2020. This paper will also be presented as a conference podium presentation during the program. Any published papers, posters, or presentations resulting from participation in the program should acknowledge this Fellowship award. Students usually arrange independent study graduate credit through their own institution, if desired. This course is the equivalent of three units (US) or five ECTs (Denmark).

Q1. Official and complete name (as shown on passport or other travel identification documents), and academic degree(s)

Q2. Email

Q3. Phone or messaging contact. Please indicate if this is a mobile number, Whatsapp, or WeChat.

Q4. Please click if you are affiliated with any of these TTRN-CITRIS universities, otherwise click on "None."

Aalborg University

Aarhus University

University of California Davis

University of California Merced

Danish Technical University

University of California Santa Cruz

Southern Denmark University/Odense University  
Hospital

Sun Yat Sen University

University of California Berkeley

Other University

Q5. Other University (write in the name)

Q6. Copy and paste the abstract of the paper you will submit to the program and present during the conference including the following (maximum 3,000 characters):

- Introduction – A short background and objective(s) of the paper
- Methods – Study design, setting, participant population, analysis, and outcome measures
- Results – Key findings or anticipated findings if study is not complete
- Discussion – Implications and limitations
- References are included in the character limit

Q7. Indicate your current academic standing.

PhD Student

Post-doctoral trainee

Faculty

Research-oriented Master's Student

Other

Q8. For Fellows (PhD students and post-doctoral trainees only)

I am applying for program fee remission only.

I am applying for both program fee remission and partial travel/lodging expense reimbursement. I can only attend with funding for both.

I do not require funding but would like to apply to be a Fellow

Q9.

For Fellows: What do you hope to gain from participating in the International Summer Institute personally and professionally? (maximum 1500 words)

Q10.

For Fellows: What do you feel you can contribute to the International Summer Institute personally and professionally? (maximum 1500 characters)

.  
A separate one-page signed letter of support from the graduate advisor, research mentor, or administrator. The letter should confirm that the applicant is a currently enrolled PhD student in good standing at the time of the application and enrolled for Fall 2020 or is a post-doctoral trainee. The letter of support should be emailed to [personalizedhealthprogram@ucdavis.edu](mailto:personalizedhealthprogram@ucdavis.edu).

Thanks for applying to the Summer Institute.

. Thanks for applying to the Summer Institute. We will be in touch with how to register if we have space available.
